Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 14 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.
